

Cat litter

Strong clumping

For years **Flamingo** guarantees high quality and affordable cat litter.

The basic product for the Flamingo cat litter is '**bentonite**', a natural type of clay that immediately concentrates moisture into a solid hard lump. Easy to scoop out. The high absorption capacity also helps to eliminate unpleasant odours.

Available in eight different types:

- > **Natural**
- > Natural + **activated carbon granulate**
- > with **Baby Powder** scent
- > Baby powder + **zeolite**
- > with **Lemongrass** scent
- > with **Lavender** scent

- > High absorption
- > Neutralises bad odours
- > Clumping
- > Low-dust

*Baby Powder
with zeolite
with baby powder
scent*

1/2

Natural > This odourless cat litter is super absorbent, which makes it absorb urine very quickly. Has decent odour control and low dust. In addition, the grains are gentle on your cat's paws. Very strong clumping, which makes it economical in use. 1 bag of 15kg is good for approximately 65 days of fresh litter (for 1 cat).

Natural + activated carbon granulate > This odourless cat litter is highly absorbent and has excellent clumping properties, which makes this cat litter very economical in use. 1 bag of 12kg is good for approximately 50 days of fresh litter (for 1 cat). It is enriched with (1%) activated carbon granulate. This granulate filters and neutralises bad odours for a long-lasting result. Ideal for people/cats who are sensitive to odours. The grains are gentle on your cat's paws.

Baby powder > This cat litter with delicious baby powder scent is super absorbent, which makes it absorb urine very quickly. Has decent odour control and low dust. In addition, the grains are gentle on your cat's paws. Very strong clumping, which makes it economical in use. 1 bag of 15kg is good for approximately 65 days of fresh litter (for 1 cat).

Baby powder + zeolite > This cat litter with a delicious baby powder scent is highly absorbent and has excellent clumping properties, which makes this cat litter very economical in use. 1 bag of 12kg is good for approximately 50 days of fresh litter (for 1 cat). It is enriched with (3% blue) zeolite. This mineral absorbs and retains bad odours. The grains are gentle on your cat's paws

Lemon grass > This cat litter with delicious fresh lemon grass scent is super absorbent, which makes it absorb urine very quickly. Has decent odour control and low dust. In addition, the grains are gentle on your cat's paws. Thanks to the addition of green zeolite minerals, this cat litter not only neutralises the unpleasant odours, but also reduces bacteria growth. Very strong clumping, which makes it economical in use. 1 bag of 12kg is good for approximately 50 days of fresh litter (for 1 cat).

Lavender > This cat litter with delicious lavender scent is super absorbent, which makes it absorb urine very quickly. Has decent odour control and low dust. In addition, the grains are gentle on your cat's paws. Very strong clumping, which makes it economical in use. 1 bag of 15kg is good for approximately 65 days of fresh litter (for 1 cat).
